Computer Programming (CSN11101)

ASSIGNMENT-1

Name : Aayansh Niranjan Date : 05/09/2025

Reg_No.: 20253004

Q1. Write a C program that prints “Hello, World!” to the console.

A1. CODE :

```
#include<stdio.h>

int main(){
printf("Hello World\n");
}
```

OUTPUT:

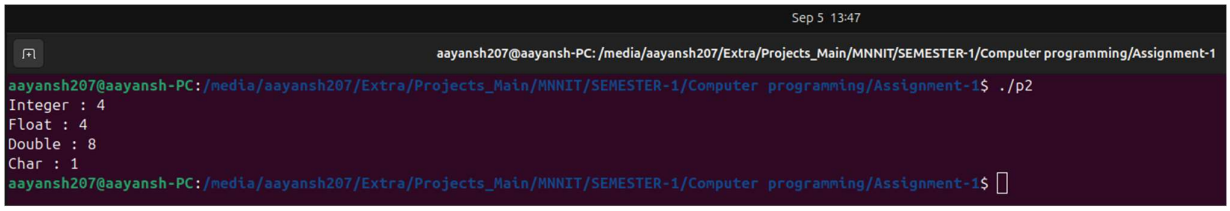

Q2. Write a Program to find the size of int, float, double, and char.

A3. CODE :

```
#include<stdio.h>

int main(){
      int a=5;
          float b=6.45;
          double c=8.56;
          char d='A';
          printf("Integer : %lu\n",sizeof(a));
          printf("Float : %lu\n",sizeof(b));
          printf("Double : %lu\n",sizeof(c));
          printf("Char : %lu\n",sizeof(d));
          return 0;
}
```

OUTPUT:

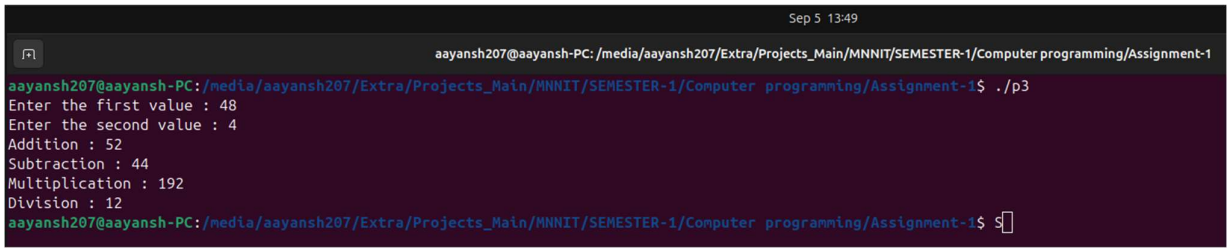

Q3. Write a program that takes two integers as input and performs addition, subtraction, multiplication, and division.

A3. CODE:

```
#include <stdio.h>

int main(){
        int a,b;
        printf("Enter the first value : ");
        scanf("%d",&a);
        printf("Enter the second value : ");
        scanf("%d",&b);
        printf("Addition : %d\n",a+b);
        printf("Subtraction : %d\n",a-b);
        printf("Multiplication : %d\n",a*b);
        printf("Division : %d\n",a/b);
        return 0;
}
```

OUTPUT:

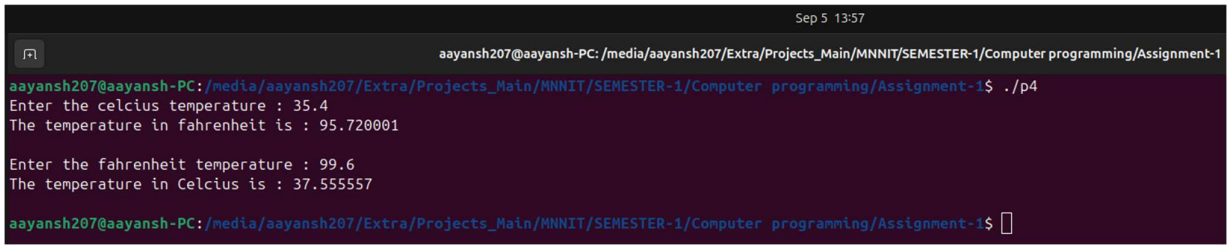

Q4. Write a program to convert temperatures from Celsius to Fahrenheit and vice versa.

A4. CODE :

```
#include <stdio.h>

int main(){
	float c,f;
	printf("Enter the celcius temperature : ");
	scanf("%f",&c);
	printf("The temperature in fahrenheit is : %f\n\n",(c*9/5)+32);
	printf("Enter the fahrenheit temperature : ");
	scanf("%f",&f);
	printf("The temperature in Celcius is : %f\n\n",(f-32)*5/9);
	return 0;
}
```

OUTPUT :

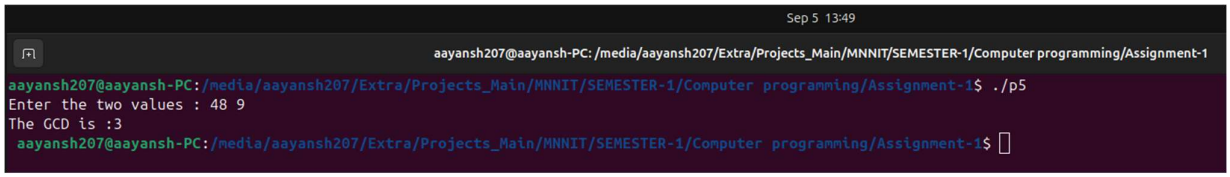

Q5. Write a C program to find the GCD of two numbers.

A5. CODE:

```
#include <stdio.h>

int main(){
		int a,b;
		printf("Enter the two values : ");
		scanf("%d %d",&a,&b);
		while(b!=0){
			int c=b;
			b=a%b;
			a=c;}
		printf("The GCD is :%d\n ",a);
		return 0;
}
```

OUTPUT:

Q6. Write a C Program to find the Maximum and minimum of two numbers without using any loop or condition.

A6. CODE:

```
#include <stdio.h>
#include <stdlib.h>

int main() {
   int a, b, maximum, minimum;
   printf("Enter two numbers: ");
   scanf("%d %d", &a, &b);
   ma = (a+b+abs(a-b))/2;
   mi = (a+b-abs(a-b))/2;
   printf("Maximum=%d\n",ma);
   printf("Minimum=%d\n",mi);
   return 0;
}
```

OUTPUT:
